6. The list of the nations which are member of the FMBB is read by the secretary

6.1. Why are several nations not up to date with their membership and contribution ?

Depending on the national structure there is delay between the time of application and the time the national organisation can approve membership

6.2 German delegation asks since when there is a contribution

Theo Dijkman : this contribution has been handled and approved in the meetings of the last years and specifically in 2004 where there were forms distributed. Also on the website of the FMBB this is accessible.

6.3 How is it possible that there are still contributions not payed ?

In some nations the national assembly has to approve and this can take some time.

7. Germany proposes to spread the information on the conventional way (sending by regular post) since not everybody has a internet connection.

► The addresses of the responsible delegates change from time to time and not always the secretary of the FMBB committee is informed up to date. Again the secretary of the FMBB urges all present delegates to inform about updates. A list of the actual addresses of this moment is spread around.
